

How to access the premium TradingView indicators

Create a TradingView account

You will need a TradingView account to access the indicators, so if you don't have one, create it at <https://www.tradingview.com>

A free account will be enough.

Take note of your username, you will need it in the next step.

Add your TradingView username on your profile

You need to login into <https://app.intothecryptoverse.com/> or the iOS/Android mobile apps.

Go to your profile clicking on the top right icon or menu.

Add your TradingView username in the form and save.

Access to the indicators will be granted within 48h. Once it's been provisioned you should receive a confirmation email.

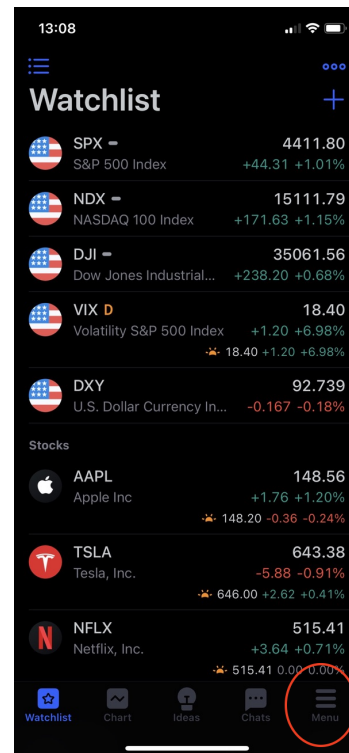

Using the indicators

Accessing the indicators will vary depending on if you are on a desktop or mobile browser or the TradingView mobile app. The details and screenshots can slightly vary, but the general idea will be the same.

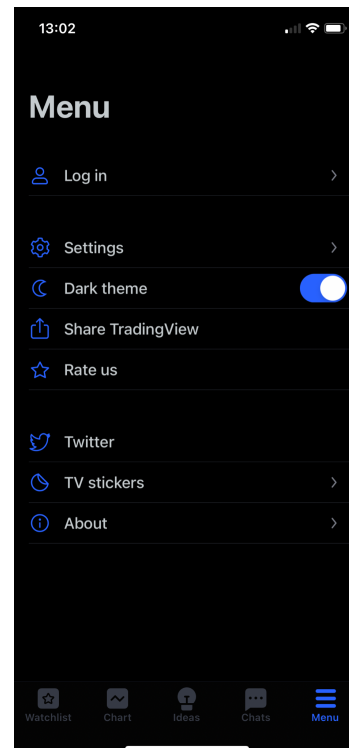

In the following sections you can find how to access the indicators on the TradingView mobile app or a desktop browser

On the mobile app:

Open the TradingView app and tap on the Menu icon

Select "Log in" and enter your TradingView credentials

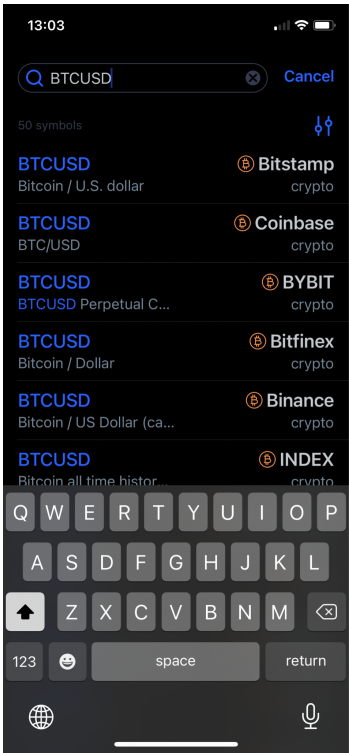

Tap on the "Chart" icon

Tap on the chart's symbol

Enter "BTCUSD", for example, and select the first option "BTCUSD on Bitstamp"

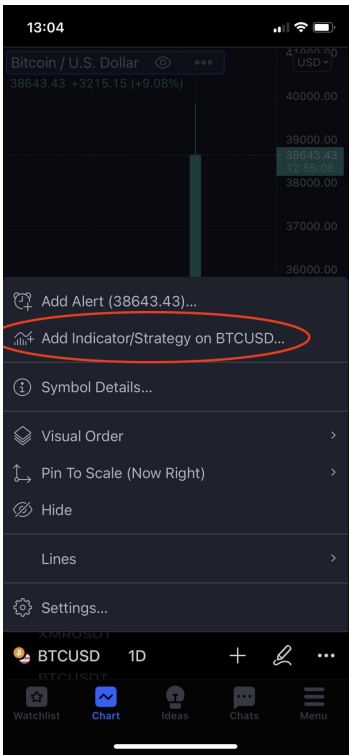

The BTCUSD graph will appear.

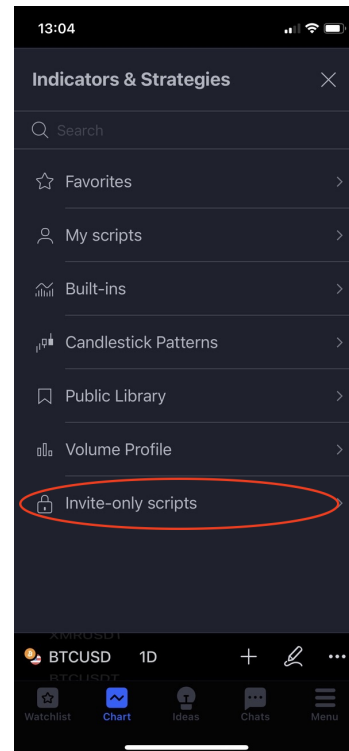

Tap on the title and then tap on the three dots.

Tap on "Add Indicator..."

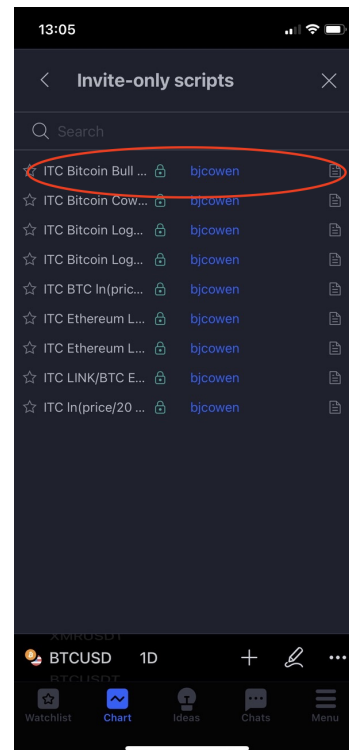

Select "Invite-only scripts"

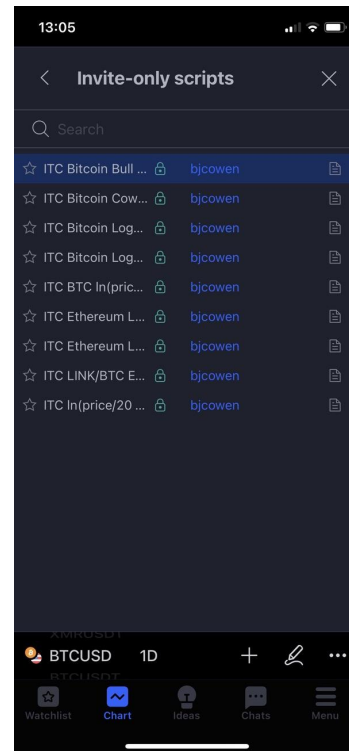

Tap once on "ITC Bitcoin Bull..."

Note: You will see a green closed lock, that is normal. It indicates you can't modify the indicator, but you can use it.

Once you select the indicator, the row will change the background to blue.

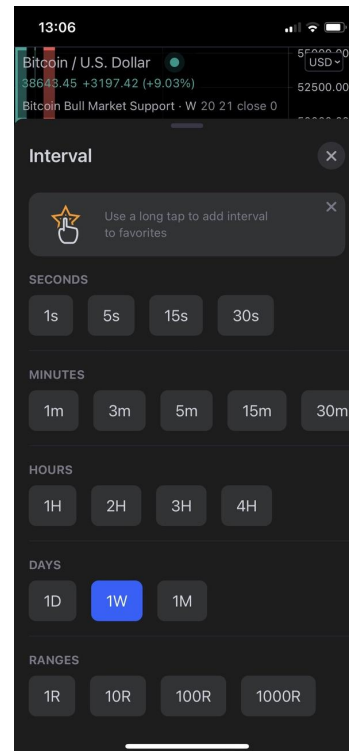

Close the popup tapping on the top right "x"

If you on a daily time frame, tap on the "1D" button

Select "1W"

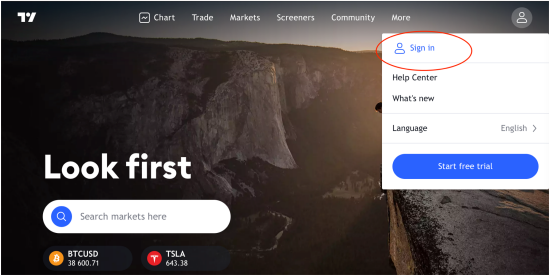

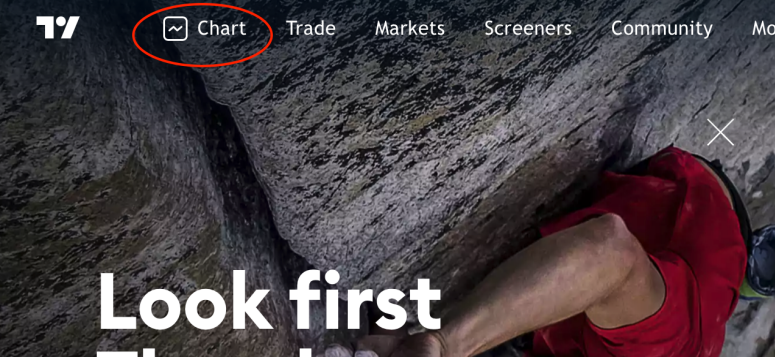

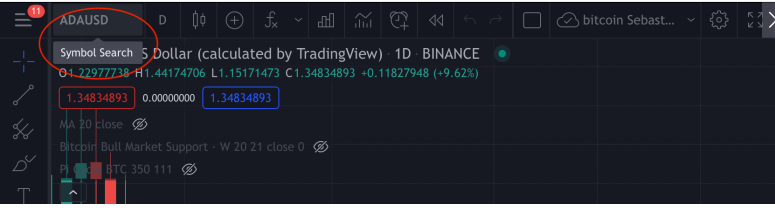

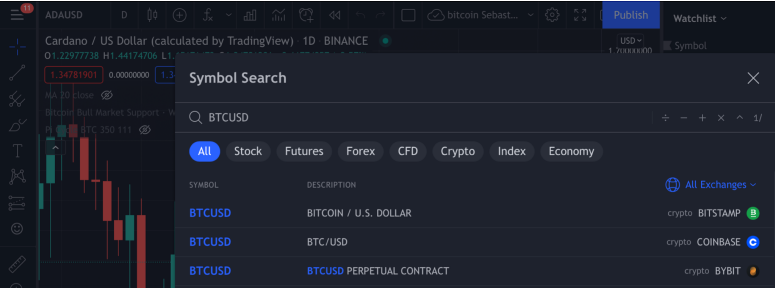

Adjust the right axis if needed.

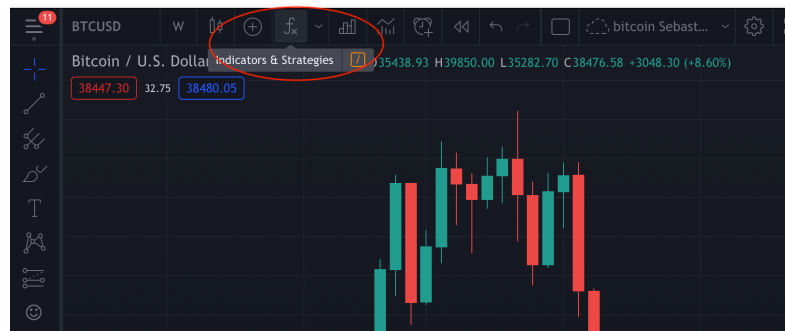

You will see the indicator on the graph.

On the desktop browser:

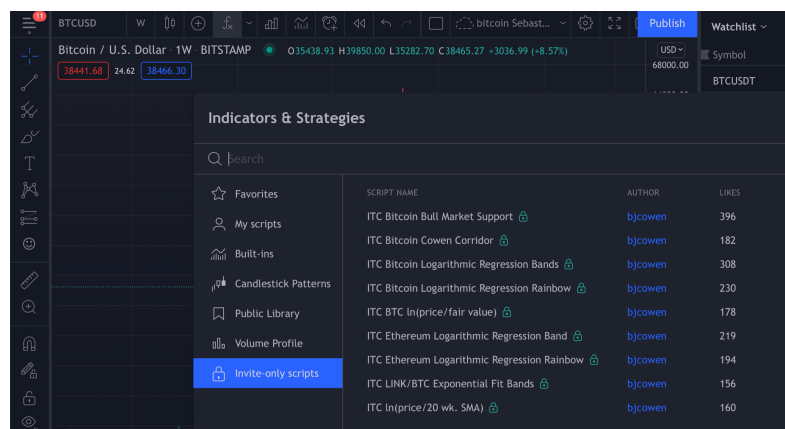

<p>Visit www.tradingview.com and select "Sign In" on the top right menu</p>	 The image shows the TradingView homepage. The 'Sign In' button in the top right navigation menu is circled in red. Other elements visible include the 'Look first' banner, a search bar, and a 'Start free trial' button.
<p>Tap on the "Chart" icon</p>	 The image shows the TradingView navigation bar. The 'Chart' icon, which is a line graph, is circled in red. Other icons for 'Trade', 'Markets', 'Screeners', 'Community', and 'More' are also visible.
<p>Click on the Symbol Search</p>	 The image shows a TradingView chart for ADAUSD. The 'Symbol Search' button in the top left corner of the chart area is circled in red. The chart displays price data and technical indicators.
<p>Enter "BTCUSD", for example, and select the first option "BTCUSD on Bitstamp"</p>	 The image shows the TradingView Symbol Search results for 'BTCUSD'. The search bar contains 'BTCUSD'. The first result, 'BTCUSD' on Bitstamp, is highlighted. Other results include 'BTCUSD' on Coinbase and 'BTCUSD PERPETUAL CONTRACT' on Bybit.

Click on "Indicators & Strategies", "fx"

Select "Invite-only scripts"

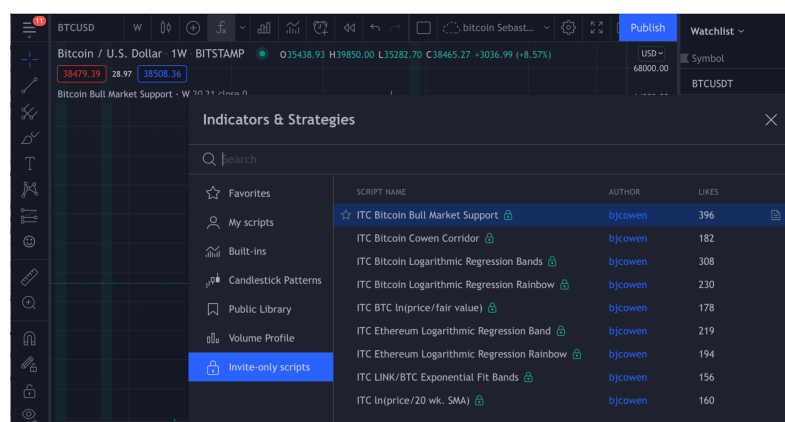

Note: You will see a green closed lock, that is normal. It indicates you can't modify the indicator, but you can use it.

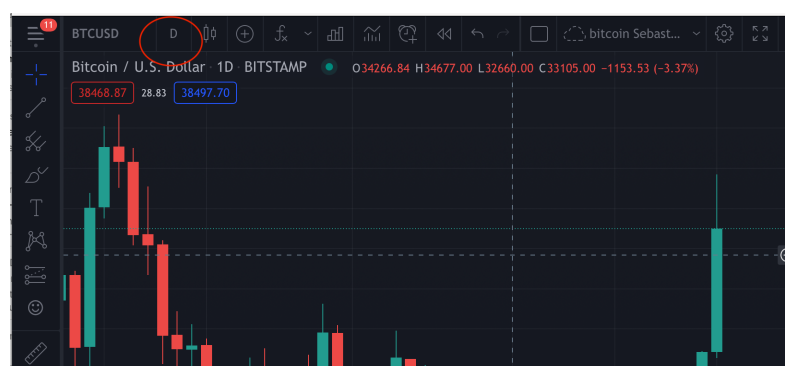

Click once on "ITC Bitcoin Bull Market Support"

Once you select the indicator, the row will change the background to blue.

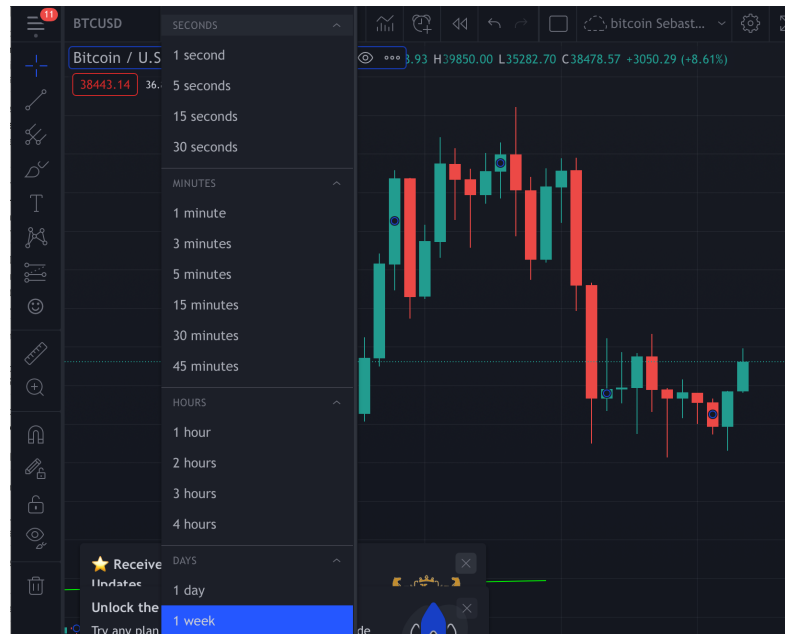

Close the popup tapping on the top right "x"

If the graph is on a daily time frame, tap on the "D" button

Select "1 week"

Adjust the right axis if needed.

You will see the indicator on the graph.
